About ENERLITES >>

Consumer needs and evolving technology standards are the driving forces of innovation and production at Enerlites.

HOME > COMPANY > ABOUT US

We are a leading national supplier of lighting controls and wiring devices. Our catalog includes patented products that concentrate on energy efficiency, high quality, and the application of cutting-edge technology. Enerlites has over 20 years of experience in design and manufacturing.

ASSOCIATIONS

We are an active member of NEMA, helping to develop and enforce compliance of technical standards across electrical product manufacturing, promotion, and use. As a proud member of NEMRA, we provide our team with powerful industry-specific tools and stay on top of market trends allowing us to properly react to changing consumer behavior.

SUPPORT

The Enerlites team is dedicated to supporting every facet of the customer experience. We ensure that every inquiry is handled with professionalism and care. Our customer service response time is less than one business day, and our hands-on team follows through on all inquiries.

VIEW MORE

APPROACH

Enerlites designs with our consumers in mind. Our products answer to functionality and aesthetic appeal. We listen to the needs of our customers to ensure complete satisfaction. Enerlites is driven to realize the promise of lighting technology to improve lives and our environment. We are dedicated to growing a greener bottom line for our distributors and partners while helping the environment. Through innovation, we constantly look for better ways to deliver value to our customers, electrical distributors and partners.

VIEW MORE

PRODUCTS

Our product line includes the first ever PIR/Humidity Sensor combination on the market and includes our extremely popular Interchangeable USB Receptacles. We have a wide selection of dimmers, switches, timers, receptacles, occupancy & vacancy sensors, wall plates, and floor boxes. Our products go through rigorous In-House testing as well as third party testing. We take pride in our work so that our devices comply with all manufacturing requirements and National Electric Codes and pass all applicable UL, ETL, FCC, Title 20 & 24, and other energy efficiency tests.
